

## PRESS RELEASE

Salzburg, Austria on May 20, 2025

### **PALFINGER MARINE showcases latest innovations and service solutions at the Nor-Shipping**

*As a leading manufacturer of innovative and reliable deck equipment and lifesaving appliances, PALFINGER MARINE will be presenting the highlights of its product portfolio at the Nor-Shipping in Oslo from June 3 to 6, 2025. The spotlight is on the powerful PFM 2100 crane, the reliable Offshore Passenger Transfer System, and the extensive global service offerings.*

*The PFM 2100 combines outreach, precision, and strength and provides a versatile solution. © PALFINGER MARINE*

“PALFINGER MARINE offers a complete package of products and services that work seamlessly together to deliver the best results. Everything we do is designed to support our customers in the toughest maritime environment: from cutting-edge lifting technology to reliable service,” says Klaus Schreiber, Vice President Sales & Service Marine and Special Solutions at PALFINGER. “At the Nor-Shipping, we’re showcasing scale models of our latest innovations – demonstrating the full potential of our smart service solutions.”

#### **PFM 2100: best-in-class model**

With the PFM 2100, PALFINGER MARINE presents its newest model and latest addition to the PFM crane series – an agile and versatile solution that was developed specifically for the aquaculture industry, focusing on the fish farming segment as well as the service and workboat sector. With a maximum outreach of over 29 meters and a lifting capacity of 4,000 kilograms at full extension, it is designed to combine outreach, precision, and strength. Its lightweight but durable structure – combined with a high-end control valve – enables fast and efficient operations. In addition, it is the

first model in the PFM series to feature the patented P-profile with nine boom extensions – for maximum efficiency in every movement.

The PFM 2100 belongs to the PFM heavy-duty foldable knuckle boom crane series, which includes the well-established PFM 2500, PFM 3500, and PFM 4500 units that have proven reliable in field use over many years. Thanks to this range of models, PALFINGER MARINE is able to offer customized crane packages consisting of two or more coordinated models. This results in system solutions that are precisely tailored to specific requirements. The combination of fast high-outreach cranes and even stronger powerhouse models creates an ideal synergy that allows even complex maritime operations to be carried out efficiently. As an experienced supplier, PALFINGER MARINE not only provides the crane technology, but also integrated systems, simplified installation, and efficient service with fast, comprehensive support.

### **Offshore Passenger Transfer System: safe and efficient**

With its 3D-compensated Offshore Passenger Transfer System (OPTS), PALFINGER MARINE is setting new standards for transporting people and cargo safely and efficiently between a ship and a fixed offshore structure. The system was developed specifically for demanding operating conditions and is ideal for maintenance work, operating semi-submersible installations, or decommissioning projects.

The OPTS is currently in the prototype phase: extensive in-house testing of the first unit started in March and will be followed by offshore trials until the end of 2025. The system is available in two versions – as a mobile, flexible solution or as a permanently integrated deck installation on a vessel – and therefore covers a wide range of maritime requirements.

### **PALFINGER MARINE service: global network, local reliability**

In addition to innovative products, PALFINGER MARINE will also be presenting its extensive range of service solutions at the Nor-Shipping. With a global network of sales and service locations and over 300 experienced service technicians, the company offers support that goes beyond simple maintenance: from preventive inspections and technical upgrades to the delivery of spare parts. As a result, PALFINGER MARINE ensures maximum operational availability and safety for its customers.

### **Visit PALFINGER MARINE at the Nor-Shipping**

PALFINGER MARINE can be found at booth C03-35 at the Nor-Shipping. Here, visitors will get a first-hand look at the range of products and service solution packages and learn how smart service concepts complement powerful technology.
