# YOUR BENEFITS AT A GLANCE

The central PALFINGER web-platform PALDESK contains everything you need to know about PALFINGER products and services. PALDESK is available to all customers around the clock. Register now and benefit from free access to serial-number-specific documentation, product history, service status and device configuration. You can also access the latest developments, offers and other product information.

## PRODUCT DOCUMENTATION AND SPARE PART INFORMATION

With just a single password you can get access to all important product data. From operating instructions and spare parts catalogs to product brochures, the PALDESK web-platform offers you all important information and data.

## PALFINGER CONNECTED

PALFINGER CONNECTED offers professional fleet management for both operators and fleet managers. CONNECTED plus+ ensures an even more comprehensive flow of information between the devices, users and fleet managers through the transmission of LIVE data using a telematics module.

## PALDIAG CMI

PALDIAG CMI is the customer version of the PALFINGER diagnostics software and allows you to see important parameters information of your PALFINGER product.

## PALCODE APP

PALCODE is available in the app stores as a standalone app and offers quick access to all existing status and error codes of all PALFINGER controls. Whether in a remote offshore location or a no-reception zone, the PALCODE apps' offline capability ensures you're always supported.

## XR APP

With the XR app, PALFINGER offers two essential augmented reality functionalities for use on smartphones and tablets.

- The **VideoScan function** enables you to start the contents of the operating instructions as a video directly from the respective chapter of the manual.
- The **3D model presentation** function brings augmented reality to your fingertips, allowing you to experience a variety of PALFINGER lifting solutions in a new dimension directly on your smart phone or tablet.
