## CONTAINER HANDLING SOLUTIONS

### CABLE HOIST

### HOOKLIFT

### CONTAINER CARRIER

Palfinger American Roll-off is built on the foundation of quality and innovation, earning a reputation for producing the strongest container handling solutions available on the market since 1972.

With a wide range of container handling solutions, Palfinger American Roll-off is your one-stop shop for Cable Roll-off Hoists, Hooklifts and Container Carriers. Holding various patents in both Hooklift and Cable Roll-off lines, we are dedicated to innovation and developing the safest, most reliable and advanced products with excellent performance on the job.

Whether you need to load or dump materials, transport containers or change bodies, we understand your needs in various industries: waste, recycling, scrap, demolition, landscaping, construction, municipalities and more!

Investing in a strong brand means that you can rely on strong equipment for the lifetime of the product - you can expect a solution with less weight, an excellent design and a long product life when you choose PALFINGER.

# PALFINGER ON THE JOB

## CONTAINER HANDLING SOLUTIONS

### CABLE HOIST

### HOOKLIFT

### CONTAINER CARRIER

The roots of Palfinger American Roll-off begin with Cable Roll-off Hoists – designed and manufactured in the USA since our establishment over 45 years ago.

This experience has built our reputation for strong hoists with superior longevity, while all of our Cable Roll-off Hoist models feature Dual Front Locks for added safety.

Our innovative designs, including the patented Top-Mount design, offer the widest range of capacities from 12,000 to 75,000 lbs.

# PALFINGER ON THE JOB

## CONTAINER HANDLING SOLUTIONS

### CABLE HOIST

### HOOKLIFT

### CONTAINER CARRIER

Offering capacity ranges of 60,000 and 75,000 lbs., our Basic and Direct Mount Cable Roll-off Hoists are strong solutions for your needs.

The Basic Mount offers a standard sub frame to mount the hoist to your chassis, adding great strength to the unit. For a lighter alternative, eliminate the sub frame and connect the hoist right to your chassis with our Direct Mount.

### TANDEM REAR ROLLERS

Tandem rear rollers reduce the stress on the container rails, allowing for easier loading and unloading by distributing the forces of the load amongst four (4) points of contact. This better supports the load and reduces the risk of damaging the container rails.

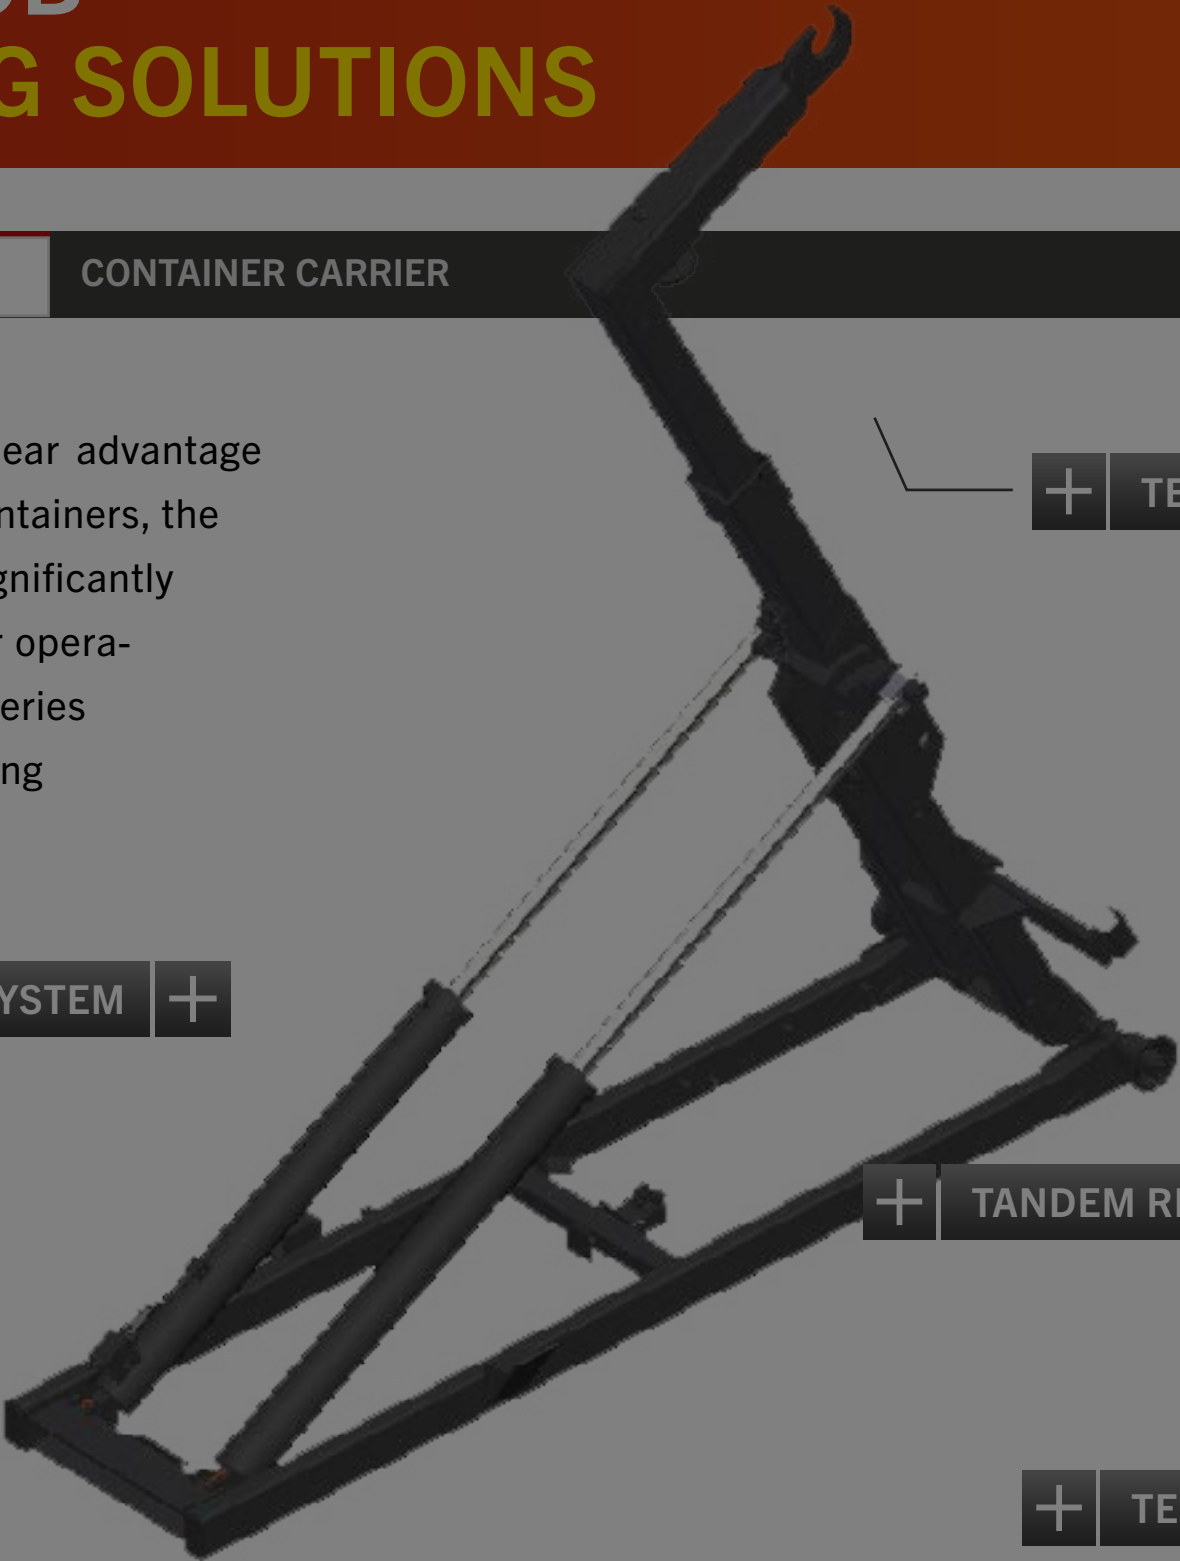

\*Available on T-Series models above 30,000 lbs.

## MULTI BODY TRANSFORMER A PARTNERSHIP BUILT FOR EFFICIENCY

Made for logging operations, deep mines and hot oil fields, Western Star has engineered heavy-duty trucks for over 40 years. Recognizing common adversities in off-road sectors across the country, including greater operating costs and high sit times for expensive, low use machines, John Tomlinson — XD & Vocational Sales Manager — set out to develop a solution that would maximize equipment uptime.

John Tomlinson  
XD & Vocational Sales Manager  
Western Star | Portland | OR

Partnering with PALFINGER, CARCO Industries and various body builders, Tomlinson established a new step in efficiency with the new MBT-40: a multi body transformer concept. Designed for off-road construction and mining, the MBT-40 can handle several applications in one day with universal connections and quick change-over times. The in-cab control panel makes it easy to exchange and run multiple truck bodies — simply apply the proper template for the application and the controls will automatically resize to the hydraulic flow and pressure of the new body. Using the PALFINGER Hooklift to load, unload and/or dump, the driver can convert a dump truck into a fully functional water tank truck in less than 15 minutes.

Or, easily convert the truck into a heavy haul tractor application using the 5th wheel deck attachment. By applying the multiple body concepts, chassis assets are maximized on the job — resulting in increased productivity and significant savings.

Previously acquainted with PALFINGER Cranes and Cable Roll-off Hoists, Western Star was introduced to the hooklift product through CARCO Industries — a PALFINGER dealer and service center in Tualatin, OR. When considering the right hooklift, payload and versatility were the most important factors. “We wanted the biggest hooklift we could get, so we could carry the most capacity,” reflects Tomlinson.

Outfitted with the PALFINGER G68 Hooklift, the MBT-40 has powerful lifting capabilities up to 68,000 lbs. with a loaded carrying capacity of 40 tons. Tomlinson comments,

**“OUR WESTERN STAR CHASSIS AND THE G68 HOOKLIFT MADE A GREAT MARRIAGE. I WAS VERY CONFIDENT TO PARTNER WITH CARCO INDUSTRIES AND PALFINGER ON THIS PROJECT, AND THE SUPPORT HAS BEEN AWESOME.”**

To introduce the MBT-40 to the market, Western Star brought approximately 70 customers/ dealers and press to the Michelin Proving Grounds, situated on over 3,300 acres in Mountville, SC, for a two day “Ride and Drive Event” in early May, 2016. A great on/off-road test track experience, the event offered an excellent opportunity to drive the first two (2) MBT-40 prototypes. To demonstrate the ease of changing applications, customers also operated the Hooklift themselves! In turn, they were very impressed with the concept of the transformer, the simplicity of the in-cab controls and the ease of operation for the driver.

“The whole product is about partnerships and how we work together. It’s a collective design through Western Star, PALFINGER, CARCO Industries, Michelin Tires and all of the body builders,” comments Tomlinson. The combined experience and expertise realized in the MBT-40 partnership ultimately created an optimal product for the off-road market. With a great concept and excellent customer feedback, Tomlinson already plans to expand this unique product line.

NEWS

ABOUT US

**PALFINGER NORTH AMERICA**  
NIAGARA FALLS, CANADA

A market leader in the design and manufacturing of knuckle boom cranes, Palfinger North America began in Niagara Falls, Canada, where a crane sales and service facility was established in 1989. Steady growth allowed for facility expansions to accommodate Crane assembly and improved service and spare parts delivery (2002-2005), in addition to a new testing hall and increased facility space (2008). The product portfolio has expanded to include PALFINGER truck-mounted forklifts, EPSILON forestry / recycling loaders and aerial work platforms.

Facility highlights include:

- ➔ Crane assembly
- ➔ Spare parts center
